Problems accessing the Library.

Make sure IMAP is turned on

To make sure IMAP is turned on please log into your bethel email

1. Click on Settings within your Bethel email

2. Next click on forwarding and POP/IMAP

3. Next Look for IMAP Access and make sure that the Status is IMAP is enabled

Fix the Security Setting

Google made some changes to their security features that are apparently messing with our off-campus server. So, while you are still logged into your Bethel email, open another browser window and copy and paste this link: https://www.google.com/settings/security/lesssecureapps. From here you need to check and make sure that the less secure option is turned on.
